

HERAMBIENTE SERVIZI INDUSTRIALI

Everything that companies need
for waste management.

 **HER**Ambiente
Società del Gruppo Hera

ITALY'S LEADING OPERATOR IN INDUSTRIAL WASTE MANAGEMENT

Free yourself from waste and free the environment. With Herambiente Servizi industriali (HASI) – Italy's leading industrial waste management company – you can do it right now. Thanks to the Herambiente Group's 100 certified plants, including 18 hubs dedicated to the recovery of industrial waste, HASI covers the whole of Italy, treats any type of waste, and offers companies a wide range of integrated and sustainable solutions. These solutions are essential for reducing companies' costs and enabling them to join the circular economy, improving their environmental performance. Europe demands it, and at HASI it is already in action.

of waste sold

100 PLANTS

including 18 hubs for recovering used industrial products

1,600 SPECIALIZED OPERATORS

TURNKEY SOLUTIONS: WITH YOU TO THE FINISH LINE

At HASI we do not offer simple services, but real solutions. This is because, when it comes to waste, there are only three things that count: transparency, traceability and quality of results. Consequently, choosing HASI means choosing a unique partner that will study your needs in detail and accompany you from A to Z, with clear objectives: relieving you of all worries, turning waste into resources, helping you grow and leaving you with time for the most important thing – building the future of your business.

IN THE SOLUTIONS FOR YOUR BUSINESS, SOLUTIONS FOR THE ENVIRONMENT

Over 80% of the waste produced in Italy today is of industrial origin. By handling this, we can boost the country's competitiveness and protect the environment, making ourselves the first port of call for businesses.

We achieve this with the help of 1,600 qualified professionals and a wide range of tailor-made, technologically advanced and constantly evolving solutions. This means that we can help every company find what it needs.

INFRASTRUCTURE AND TECHNOLOGY

The only plant facilities of their kind in Italy, capable of handling all types of waste (solid, liquid, hazardous and non-hazardous)

EFFICIENCY AND SUSTAINABILITY

Sustainable Global Waste Management services for transition to the circular economy, efficiency, waste reduction and improved environmental performance through plans tailored to each customer

TRACEABILITY AND TRANSPARENCY

Online customer account for booking deliveries and tracking each flow

WE GET WHERE WE ARE NEEDED

Our plants and a network of qualified national and European partners allow us to take any waste to its ideal destination, maximising recovery and recycling every step of the way.

OPENING UP INDUSTRY TO THE FUTURE

Think of a challenge - we are already overcoming it. Whether it's micro-collections for small businesses or transporting, treating and disposing of all types of waste for SMEs and large industrial groups, HASI is there. But that's not all - to improve your company's environmental performance, we offer a wide range of integrated and customised solutions to help your business become more efficient, sustainable and ready for the challenges of tomorrow.

ALIPLAST

Your plastic waste can be given a new lease of life by being turned into high-quality secondary raw materials (film, sheets and polymers), through the combination of HASI's offer with the services of Aliplast, a subsidiary of Herambiente.

GLOBAL WASTE MANAGEMENT

A single point of contact for the provision of all environmental services, even for large multi-site companies: environmental auditing, chemical analyses, production process optimisation, micro-collection, remediation, storage, transport, treatment and recovery of all types of hazardous and non-hazardous waste.

OPERATION & MAINTENANCE

On-site management and maintenance of private waste treatment plants, including those supporting the production cycle for water treatment with remote control technologies.

HERA BUSINESS SOLUTION

The Hera Group's multi-service offer: a single partner not only for environmental services, but also for the supply of green energy, energy and water efficiency plans, self-consumption energy production, ICT services and lighting system upgrades with LED technology.

REMEDIAL SOLUTIONS AS PART OF THE CIRCULAR ECONOMY

When the environment calls, HASI answers. Wherever there are changes to the quality characteristics of soil, surface water or groundwater, HASI has a remediation division which can work at disused sites

of petrochemical, oil and steel companies. Through this division, we respond effectively to port authorities, remediation consortia and private individuals.

FOR EACH REMEDIATION, WE FOLLOW A DETAILED ANALYSIS AND PLANNING PROCESS...

...UNTIL ARRIVING AT THE SOLUTION

IN SITU

without handling or removal of contaminated material

ON SITE

with handling and removal of contaminated material and soil, but with treatment on the premises itself and possible reuse

OFF SITE

with handling and removal of contaminated material and soil off the premises

EMERGENCY SECURING

removal and provisional isolation of contaminated sources in the event of accidental releases

In 2021 NewCo Tremonti was established, specialising in soil and groundwater remediation services with mixed on-site and off-site treatment. The following are part of Tremonti:
HERAMBIENTE - AMBIENTHESIS - EDISON - SERSYS AMBIENTE
